Abstrak

[ABSTRAK

Kabupaten Tebo dalam peningkatan daya saing daerah berusaha mengembangkan sektor yang menjadi basis perekonomian terutama komoditas karet. Tujuan penelitian ini yaitu: Menganalisa peran sektor karet dalam perekonomian Kabupaten Tebo dalam penciptaan output penyerapan tenaga kerja serta melihat efek penggandanya; Melakukan perbandingan kenaikan ekspor sektor karet dengan kenaikan ekspor sektor industri karet, barang dari karet dan plastik terhadap perekonomian kabupaten Tebo dan Mengetahui tingkat keterkaitan sektor karet dengan sektor-sektor lainnya dalam mendorong perkembangan sektor-sektor tersebut. Penelitian ini menggunakan tabel input output Provinsi Jambi yang diturunkan dengan metode Location Quotient (LQ) untuk mendapatkan koefisien tabel I-O Kabupaten Tebo untuk menjawab tujuan penelitian-

Hasil penelitian menunjukkan bahwa perkembangan karet mempunyai efek pengganda yang lebih besar dari sektor industri karet, barang dari karet dan plastik. Peningkatan ekspor yang berpengaruh antara sektor karet dan sektor industri karet, barang dari karet dan plastik, dari hasil simulasi menunjukkan sektor karet memberikan dampak yang lebih besar terhadap perekonomian. Sektor karet juga memiliki keterkaitan ke depan dan ketertkaitan ke belakang yang lebih baik dari sektor industri karet, barang dari karet dan plastik

ABSTRACT

Tebo District in improving the competitiveness of the region are trying to develop a sector that became the basis of the economy, especially rubber. The purpose of this research are: Analyzing the role of the rubber sector in the economy Tebo in the creation of output employment and see the effect multiplier; Conducting comparative increase in the export rubber sector with rubber industry sectors, goods of rubber and plastic sector on the economy Tebo district and know the level of the rubber sector linkages with other sectors to encourage the development of these sectors. This study uses input-output tables Jambi Province derived by the method of Location Quotient (LQ) for the gain coefficient Tebo IO table to answer the research objectives.

Result of research find that rubber sector have a greater multiplier effect of the rubber industry, rubber and plastic goods sector. Simulated increase in exports in the same amount of rubber sector and the industrial rubber goods, and plastics sector showed rubber sector have greater impact on the economy" Rubber sector also have forward linkages and backward linkages better than the rubber industry, goods of rubber and plastic sectors.;Tebo District in improving the competitiveness of the region are trying to

develop a sector that became the basis of the economy, especially rubber.
