Abstrak

ABSTRAK

Penelitian yang dilakukan bertujuan melihat efektivitas program permainan simulasi lingkungan terhadap pembentukan environmental attitude tentang sampah untuk anak usia 4 – 6 tahun. Penelitian dilakukan terhadap 11 anak dari ISCO (International Street Children Organization) Duri Kosambi dan diukur menggunakan modifikasi CATES-PV sebelum dan sesudah program intervensi. Desain penelitian yang digunakan adalah one group pre-test post-test design. Hasil uji beda skor pre-test dengan post-test menunjukkan perbedaan yang signifikan antara hasil sebelum dan sesudah dilakukan program intervensi.

ABSTRACT

The aim of this research is to investigate the effectiveness of environmental simulation games towards environmental attitude about garbage for four to six years old preschool children. Eleven children from ISCO (International Street Children Organization) Duri Kosambi area are tested using the modification of CATES-PV both before and after the intervention program. This research uses one group pre-test post-test design. The t-statistic shows that there are significance differences between individual average test scores before and after the intervention.
