### Abstrak

[<b>ABSTRAK</b><br>

Penelitian ini bertujuan untuk menganalisis dampak perdagangan internasional terhadap kesenjangan gender di sektor manufaktur di Indonesia berdasarkan teori Becker. Menurut teori ini, perdagangan internasional meningkatkan persaingan industri dan pada gilirannya menurunkan diskriminasi gender. Ini merupakan studi tingkat industri yang membandingkan efek dari perdagangan internasional pada kesenjangan upah gender dan lapangan kerja perempuan dalam industri yang kompetitif dan industri terkonsentrasi.

<br><br>

Hasil analisis menunjukkan bahwa perdagangan internasional menurunkan ketidaksetaraan gender dalam industri terkonsentrasi karena menurunkan kesenjangan upah gender dan meningkatkan lapangan kerja perempuan. Sementara itu, ketidaksetaraan gender memburuk dalam industri kompetitif karena perdagangan meningkatkan kesenjangan upah gender dan mengurangi tenaga kerja perempuan.;

<b>ABSTRACT</b><br>

This research aims to analyze the impact of international trade on gender inequality in Indonesian manufacturing sector based on Becker's theory. According to this theory, international trade boosts industry competition and in turn lowers gender discrimination. This is an industry-level study that compares the effects of international trade on gender wage gap and female employment in competitive industries and concentrated industries.

<br><br>

The results of the analysis indicate international trade alleviate gender inequality in concentrated industry because it lowers gender wage gap and increases female employment. Meanwhile, gender inequality worsened in competitive industry because trade increase gender wage gap and reduce female employment; This research aims to analyze the impact of international trade on gender inequality in Indonesian manufacturing sector based on Becker's theory. According to this theory, international trade boosts industry competition and in turn lowers gender discrimination. This is an industry-level study that compares the effects of international trade on gender wage gap and female employment in competitive industries and concentrated industries.

The results of the analysis indicate international trade alleviate gender inequality in concentrated industry because it lowers gender wage gap and increases female employment. Meanwhile, gender inequality worsened in competitive industry because trade increase gender wage gap and reduce female employment; This research aims to analyze the impact of international trade on gender inequality in Indonesian manufacturing sector based on Becker's theory. According to this theory, international trade boosts industry competition and in turn lowers gender discrimination. This is an industry-level study that compares the effects of international trade on gender wage gap and female employment in competitive

industries and concentrated industries.

The results of the analysis indicate international trade alleviate gender inequality in concentrated industry because it lowers gender wage gap and increases female employment. Meanwhile, gender inequality worsened in competitive industry because trade increase gender wage gap and reduce female employment; This research aims to analyze the impact of international trade on gender inequality in Indonesian manufacturing sector based on Becker's theory. According to this theory, international trade boosts industry competition and in turn lowers gender discrimination. This is an industry-level study that compares the effects of international trade on gender wage gap and female employment in competitive industries and concentrated industries.

The results of the analysis indicate international trade alleviate gender inequality in concentrated industry because it lowers gender wage gap and increases female employment. Meanwhile, gender inequality worsened in competitive industry because trade increase gender wage gap and reduce female employment, This research aims to analyze the impact of international trade on gender inequality in Indonesian manufacturing sector based on Becker's theory. According to this theory, international trade boosts industry competition and in turn lowers gender discrimination. This is an industry-level study that compares the effects of international trade on gender wage gap and female employment in competitive industries and concentrated industries.

The results of the analysis indicate international trade alleviate gender inequality in concentrated industry because it lowers gender wage gap and increases female employment. Meanwhile, gender inequality worsened in competitive industry because trade increase gender wage gap and reduce female employment]
