Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20404726&lokasi=lokal>

Abstrak

[ABSTRAK
Tulisan ini diawali dari rasa kekhawatiran penulis akan berbagai kejadian kekerasan yang

dialami perempuan. Dalam era dimana perempuan sudah demikian majunya, baik dalam pendidikan maupun profesi, namun kekerasan yang dialami perempuan seakan tidak pandang bulu. Fenomena tersebut memunculkan pertanyaan penulis: "Sejauh mana muatan muatan diskriminasi gender secara tersirat ada dalam peraturan dan kebijakan Pemerintah dan swasta ?" Pengumpulan data dilakukan melalui berbagai sumber, baik dari media maupun peraturan terkait. Hasil analisis menemukan bahwa secara tersirat memang ditemukan adanya diskriminasi gender. Namun apakah berimplikasi pada kekerasan atau tidak, sangat tergantung pada bagaimana pihak terkait menginterpretasikannya.

ABSTRACT

This journal begins with my concern on various kind of violence against women. In the era of women empowerment had reached significant improvements both in education and professional work field, however violence remains to threaten women indiscriminately. This phenomenon raises my attention on "how far contents of gender discrimination are reflected in policies or regulations of government and private sectors?" Data gathering are collected from various sources, including medias and related regulations. Result of analysis reflects that there is an implicit gender discrimination. However on whether it would implicate to violence or not, shall highly be dependent on how the related party would interpreted the regulations., This journal begins with my concern on various kind of violence against women.
