Abstrak

[**ABSTRAK**] Kementerian Agama sebagai organisasi pemerintah tentunya fokus pada peningkatan pelayanan masyarakat yang transparan dan akuntabel. Oleh karena itu teknologi informasi TI harus dikelola dengan tepat sehingga berimbang pada kualitas layanan kepada masyarakat. Untuk mengetahui sejauh mana kinerja TI dikelola dengan baik perlu dilakukan pengukuran tata kelola TI COBIT 5 merupakan kerangka kerja yang digunakan untuk menilai mengukur mengontrol tata kelola dan manajemen TI pada suatu organisasi. Kementerian Agama masih memiliki banyak permasalahan dalam pengelolaan TI. Pusat Informasi dan Hubungan Masyarakat PINMAS sebagai unit pengelola TI di Kementerian Agama perlu melakukan perbaikan. Maka dilakukan penelitian mengenai pengukuran tingkat kapabilitas tata kelola TI di PINMAS dengan kerangka kerja COBIT 5. Pengukuran dilakukan berdasarkan pemetaan tujuan organisasi dan permasalahan TI yang umum terjadi terhadap masing-masing proses pada COBIT 5. Dari pengukuran tersebut diketahui bahwa dari 13 proses yang terpilih 10 proses berada pada tingkat kapabilitas level 0 incomplete dan 3 proses berada pada level 1 ad hoc. Hal ini menunjukkan bahwa organisasi masih belum mengetahui permasalahan yang terjadi dan belum mengimplementasikan panduan tata kelola TI berdasarkan COBIT 5. Setelah dilakukan pengukuran kemudian disusun rekomendasi perbaikan serta berdasarkan hasil pengukuran dan target yang ingin dicapai oleh organisasi.
