Abstrak

This book emphasises the importance of law and policy while generating ocean governance initiatives. “Good ocean governance” as a new way of thinking, needs to be supported by legislation and decision makers. It is, therefore, necessary to examine whether the idea of good ocean governance exists within the international legal system and is subsequently subject to transfer into the domestic law. During this transaction process, a number of examples provided from the United States, Canada and Australia help to demonstrate the broad picture. Also included are discussions on the governance of marine resources, ship recycling and marine pollution, the impact of maritime clusters as well as social and culture impact of ports.
