

Politics and development in a transboundary watershed : the case of the Lower Mekong Basin

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405558&lokasi=lokal>

Abstrak

The topic this volume addresses is situated in the nexus of an IR- (International Relations) approach focussing on transboundary politics and its inclination to remain within the sphere of state sovereignty and national interest on the one hand, and Development studies, with its imperatives on participation, planning, and intervention, on the other. The dilemma, of better understanding transboundary water management lies in how to understand how these two rationalities can be simultaneously nurtured.
