

Seeds of sustainability : lessons from the birthplace of the green revolution

Matson, Pamela A., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405615&lokasi=lokal>

Abstrak

Seeds of sustainable agriculture is a groundbreaking analysis of agricultural development and transitions toward more sustainable management in one region. It examines new approaches to make agricultural landscapes healthier for both the environment and people. The Yaqui Valley is one of the most intensive agricultural regions of the world. It also faces resource limitations, threats to human health, and rapidly changing economic conditions.
