

Soil-subsurface change : chemical pollutant impacts

Yaron, Bruno, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405624&lokasi=lokal>

Abstrak

This book combines soil science, earth science, and environmental geochemistry, providing comprehensive background information for specialists interested in chemical-induced changes in the soil-subsurface system. The major focus of the book is on changes to the soil-subsurface matrix and properties caused by chemical pollution. The numerous examples presented in the book confirm that chemical contamination should be considered as an additional factor in the formation of a contemporary soil-subsurface regime that is different than that of the pristine system.
