

True-3D in cartography : autostereoscopic and solid visualisation of geodata

Manfred Buchroithner, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405729&lokasi=lokal>

Abstrak

This book covers most aspects of (auto-) stereoscopic representation techniques of both topographic and thematic geodata, be they haptic or not. Theory is treated as well as are many fields of concrete applications. Displays for big audiences and special single-user applications are presented, well-established technologies like classical manual fabrication of landscape reliefs contrast with cutting-edge developments.
