

Water, cultural diversity, and global environmental change : emerging trends, sustainable futures?

Johnston, Barbara Rose, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405743&lokasi=lokal>

Abstrak

This book represents an effort to examine the complex role water plays as a force in sustaining, maintaining, and threatening the viability of culturally diverse peoples. It is argued that water is a fundamental human need, a human right, and a core sustaining element in biodiversity and cultural diversity. The core concepts utilized in this book draw upon a larger trend in sustainability science, a recognition of the synergism and analytical potential in utilizing a coupled biological and social systems analysis, as the functioning viability of nature is both sustained and threatened by humans.
