

A prehistory of polymer science

Patterson, Gary, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405783&lokasi=lokal>

Abstrak

The prehistory of polymer science helps to provide key insights into current issues and historical problems. The story will be divided into an ancient period (from Greek times to the creation of the molecular consensus), a nascent period (from Dalton to Kekule to van't Hoff) and a period of paradigm formation and controversy (from Staudinger to Mark to Carothers). The prehistory concludes with an account of the epochal 1935 Discussion of the Faraday Society on "polymerization".
