

Advanced ceramic technologies & products

Imanaka, Yoshihiko, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405786&lokasi=lokal>

Abstrak

This book describes in detail the background to and objective of the development, materials, manufacturing processes, functions and future prospects of a number of ceramic products. Not merely about the science and technology of ceramic manufacturing, the book is about the products themselves, as it tries to clarify how ceramics continue to contribute to our lives. It is the first such work to show advanced ceramic products in detail, from the technologies used to their application, and can be seen as a kind of illustrated reference book for modern advanced ceramic products as it is filled with easy-to-understand illustrations and photos.
