

Alkane C–H activation by single-site metal catalysis

Perez, Pedro J., editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405790&lokasi=lokal>

Abstrak

The book presents the current state-of-the-art development in the catalytic systems for the catalytic transformations of alkanes under homogeneous conditions. The history of C-H bond activation, and the current research described in this book, highlight the current research and present the reader with an outlook of this field which continues to be explored by an increasingly visionary and enthusiastic group of organic, organometallic, biological and physical chemists.
