

Mycotoxins in feedstuffs

Weidenbörner, Martin, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20405942&lokasi=lokal>

Abstrak

Mycotoxins are substances produced from fungal secondary metabolic processes. They impair animal health, thereby causing great economic losses of livestock through disease.

This second edition will feature :

- More than 180 new publications concerning mycotoxins in feedstuffs
- A single-chapter overview of mycotoxins in the corresponding feedstuffs.
