

Self-assembly of nanostructures : the INFN lectures, vol. III

Stefano Bellucci, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406045&lokasi=lokal>

Abstrak

This is the third volume in a series of books on selected topics in Nanoscale Science and Technology based on lectures given at the well-known Istituto Nazionale di Fisica Nucleare (INFN) schools of the same name. A tutorial lecture by Motta et al. presents the analysis of the Poly(3-hexylthiophene) self assembly on carbon nanotubes and discusses how the interaction between the two materials forms a new hybrid nanostructure, with potential application to future solar cells technology.
