

Transition metal catalyzed enantioselective allylic substitution in organic synthesis

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406092&lokasi=lokal>

Abstrak

This book about selectivity in palladium catalyzed allylic substitution, computational insights into palladium-mediated allylic substitution reactions, palladium-catalyzed enantioselective allylic substitution, iridium-catalyzed asymmetric allylic substitutions, molybdenum- and tungsten-catalyzed enantioselective allylic substitutions, copper-catalyzed enantioselective allylic substitution, allylic substitutions catalyzed by miscellaneous metals, and enantioselective allylic substitutions in natural product synthesis.
