### Abstrak

Background: The maternal mortality rate in Indonesia is still quite high. At the Provincial level, the maternal mortality varies widely. West Java Province is the largest contributor to maternal mortality with the estimated number 19.8% of all maternal deaths in Indonesia. While the province of Yogyakarta contribution is relatively small (1.1%). Objective: To compare the provision of iron tablets by health workers and pregnant women compliance consume, in urban slums in West Java Province and Yogyakarta. Methods: This study describes and analyzes object that is obtained from the Riskesdas 2010. Result: based on the characteristics, the majority of mother in the province of Yogyakarta are in middle education level, working as self employed/farmer/fisherman/laborer. Meanwhile, in West Java province, mostly just poorly educated and do not have a job. Total ownership of health insurance in the province of Yogyakarta relatively more than in province of West Java. Based on the scope of the giving of iron tablets, it appears that most of the mothers in the province of West Java and Yogyakarta get iron tablets during pregnancy (84.7%). However, this condition is much different when viewed from the percentage of pregnant woman who consumed least 90 tablets of iron tablets. seen that pregnant woman who consumed iron tablets in West Java province only 12.6 percent. By contrast, in the province of Yogyakarta, the consumption of iron tablets 90 percentage is quite high, reaching 60.0%. Conclusion: Coverage giving iron tablets in Both Provinces relatively good. However, the consumption of iron tablets 90 tablets in Yogyakarta Province is relatively better than in West Java Province. Recommendations: It is suggested for the provincial government of West Java and other areas for the promotion and extension through various media as well as to make a breakthrough, such as pointing person the closest of the pregnant mother for to be a supervisor and motivator for willing consume iron tablets during pregnancy 90 tablets.
