

Kajian Jaringan Kerja Sama LSM, Asosiasi, dan dunia Usaha di Kota Yogyakarta dan Kota Bandung (Studi Upaya Kesehatan Berbasis Masyarakat)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406251&lokasi=lokal>

Abstrak

Ministry of health has been released the policy and strategy on decentralization of health. The local government must be able to arrange and develop the district health systems expected to facilitate of cooperation networks development such as: non government organizations, associations, and business sectors. It has been followed up also workshop to compile and make the guidance of cooperation networks. But that way not yet been met the existence of information about how far the policy have been conducted by local government. The objective of the research is to find out how to analyze the cooperation network activities to support development of health on local government. Results of the research shown that the cooperation network contribution for health efforts have quite a lot and multifarious, but still require to be improved. Contribution from business sectors its proportion still is low. Recommendations of the research results are to explain that local government must be to facilitate development and strengthening of the health cooperation networks need more improved. Besides it, facilitation of knowledge and activity, require to be breakthrough find of resources for the cooperation network activities.
