

Analisis pencapaian target program promosi kesehatan menurut jenis puskesmas di Kabupaten Tulungagung (Uji komparasi MAnn Whitney Test-Data Rifaskes 2011)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406551&lokasi=lokal>

Abstrak

Mann Whitney analysis result based on Puskesmas with inpatient and without inpatient in achieving Desa Siaga Aktif target because $\text{sig}=0,308 > [\alpha](0,05)$. Descriptively, inpatient Puskesmas in rural areas are doing more effort in conducting Promkes four dimensional program compared to non-inpatient Puskesmas.
