

Pengetahuan, sikap, dan perilaku ibu bayi terhadap pemberian ASI eksklusif

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406556&lokasi=lokal>

Abstrak

Results predisposing factors such as knowledge, attitudes, and behaviour of the mother, where the majority of women still do not understand the benefit of exclusive breastfeeding. Employment, education, and number of children under five years old as well as a predisposing factor in exclusive breastfeeding. Enabling factors such as early initiation of breastfeeding, the place of delivery, and the availability of lactation rooms. Status of maternal health, family support and delivery helper as a factor reinforcing the exclusive breastfeeding.
