Abstrak

The utilization of information technology will support library service to be more effective and efficient. Current challenges faced by librarians are mostly related to the internet networks and the latest gadget utilization. Mobile technology for library is considerably important for librarians. Mobile access facility has been a challenge for future library. As today, information is on your finger tips. It means that access to information can be done by using mobile devices. Thus, standard mobile library service shall be the objective of library development. Librarians must acknowledge the technology and mobile trend. They also have to able to forecast the effect of mobile technology on library services.
