

Manajemen risiko sistem informasi manajemen perpustakaan

Arif Nurochman

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20406712&lokasi=lokal>

Abstrak

It is important to apply risk management in library information system management to anticipate many threats and risks which can resist library services. In the concept of library service, should there be a disconnection of electric current it is certain that the services will be down. Long story short, whatever done to curb or minimize disadvantages is an effort to manage risks.
