

Process mineralogy in the mineral industry

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407065&lokasi=lokal>

Abstrak

The importance of process mineralogy in the mineral industry is not limited only to those matters related to mineral processing but applies also to other purposes such as mineral exploration and environmental studies. The technique helps in identifying phase, phase chemistry, phase abundance, associations, grain size, micro textures, and other characteristic that, from the mineralogy point of view can cause a problem. Thus the problems can be solved properly.
