

Mining investment policies in Indonesia

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407078&lokasi=lokal>

Abstrak

It is well known that the Asia Pacific region is the focus on a global scale from the world's largest mining houses. Asia is indeed an exploration hot spot especially among the Australian and North American mining companies. Indonesia at present ranks close to or at the top position as preferred destination for mining investment combining a strong basis of geological prospective with conducive mining law, taxation imposts and low political risks to mineral exploration and development.
