

Distance learning: video conferencing in education, the mining industry

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407160&lokasi=lokal>

Abstrak

Opportunities for use of video conferencing in education and communication to the mining and metallurgy industry in Australia and nearby countries are discussed. In particular, experiences gained at the University of Queensland from presenting advanced short courses, postgraduate subjects, under-graduate teaching, interaction with overseas countries and management of research at remote mining sites are examined. Some barriers to usage the system are highlighted.
