

Land use allocation for mining activity to support spatial plan policy in Lombok Island

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407180&lokasi=lokal>

Abstrak

The utilization of mineral resources needs a land use allocation to benefit the resources optimally as well as to avoid the interest conflict of land use among other sectors. Land use allocated for mining industry consist of three categories. Generally the potential of mineral industries found in Lombok Island is classified into land that could be extended with requirement.
