

Rehabilitation of mining sites in PT Koba Tin

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407221&lokasi=lokal>

Abstrak

Economic growth in Indonesia has been accompanied by technical advancement and increasing environmental awareness. This paper describes how Koba Tin has sought to maintain its position as one of the world's lowest unit cost producers of tin whilst simultaneously recognizing its responsibility to minimize the impact of its mining activity on the environment.
