

Power distribution and performance analysis for wireless communication networks

Zhao, Dongmei, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20407707&lokasi=lokal>

Abstrak

This book provides an analysis of transmission power and network performance in different wireless communication networks. It presents the latest research and techniques for power and interference control and performance modeling in wireless communication networks with different network topologies, air interfaces, and transmission techniques. While studying the power distributions and resource management, the reader will also learn basic methodology and skills for problem formulations, can ascertain the complexity for designing radio resource management strategies in modern wireless communication networks, thus keeping pace with state-of-the-art research progress in radio transmission technologies.
