

Pengolahan Sampah Rumah Tangga sebagai Ladang Penghasilan Tambahan Masyarakat

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20408567&lokasi=lokal>

Abstrak

The Paradigma that solid waste not to be use and does not have economic value, as soon as possible would be eliminated, the real facts indicates that solid waste become the raw material of profitable business and could give an extra income, especially to people who no longer work formally. In the other hand, solid waste become an inspiration of public to increase public economics. Handling solid waste that starting from the raw material, already done by the community of RW 03, Sub-District Mampang Prapatan, South Jakarta. This is the pilot project of PT Unilever to prove that solid waste can give the extra income. This papers will describe how the community participation can exploit maximum of potency of solid waste with the perfect method of produce which integrated, as near by possible from source of garbage, and can yield.
