Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20408633&lokasi=lokal>

Abstrak

Ketuk Cave complex as apart of Pawon karstic area. It located at the eastern side of Pawon Cave. The collecting data from Ketuk Cave complex had been down by survey and excavation. The conclusion based on the research is some of cave on Ketuk Cave complex had some indication about human activity in the pastonit location. The artifactual remains had found such as in Ketuk Cave 3,4, and Ketuk Cave above. The carbon dating analysis from the samples and stalactite had been shown about it chronology, 1560 ± 140 BP(sand) and 3260 ± 120 BP(stalactite). That mean a while, the human activity there is not in the same era with in Pawon Cave. Pawon Cave had the carbon dating chronology during 5660 ± 180 BP until 9525 ± 200 BP.
