

Remote sensing alumni in the faculty of Geography Gadjah Mada University

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20408800&lokasi=lokal>

Abstrak

Remote sensing is a very useful tool for geographic study. It is on the basis of the idea that this subject has been offered for 3 decades in the UGM Faculty of Geography. This article briefly discusses the progress of remote sensing alumni in as viewed from the type of remote sensing system, which are studied, the method of interpretation used, and the fields of its application. Internal as well as external factor do affect this progress. The internal factor comprises the availability of teaching staff members and laboratory, while the external factor is mainly determined by the growing demand of the output.
