

Bisociative knowledge discovery : an introduction to concept, algorithms, tools, and applications

Michael R. Berthold, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20410154&lokasi=lokal>

Abstrak

The focus of this book, and the BISON project from which the contributions are originating, is a network based integration of various types of data repositories and the development of new ways to analyse and explore the resulting gigantic information networks. The 32 contributions presented in this state-of-the-art volume together with a detailed introduction to the book are organized in topical sections on bisociation, representation and network creation, network analysis, exploration, and applications and evaluation.
