Abstrak

[ABSTRAK

Tujuan dari penelitian ini adalah untuk menguji kebijakan cash holding pada perusahaan yang dikelompokkan dalam financial constraints dan not financial constraint pada sektor industri manufaktur tahun 2001-2010. Metode yang digunakan dalam penelitian ini dengan analisis diskriminan. Hasil analisis diskriminan menunjukkan bahwa kelompok financial constraints dan not financial constraint dijelaskan oleh variabel diskriminan yaitu leverage, capital expenditure, operating cash flow, market to book ratio, size dan number block holder.

ABSTRACT

The purpose of this study was to examine the company's policy of holding cash are classified in the financial constraints and not financial constraints on the manufacturing sector in 2001-2010. The method used in this study with discriminant analysis. Discriminant analysis results showed that the group financial constraints and financial constraints are not explained by the discriminant variable leverage, capital expenditure, operating cash flow, market to book ratio, size and number block holder.:The purpose of this study was to examine the company's policy of holding cash
