Abstrak

[ABSTRAK

Penelitian ini membahas tentang kekerasan struktural yang dialami oleh lansia. Penelitian dilakukan dengan melihat adanya kerentanan sosial yang dialami oleh lansia sebagai hasil dari konstruksi sosial yang merendahkan tentang lansia yang terbentuk di dalam struktur masyarakat. Selain konstruksi sosial yang merendahkan, kemiskinan yang dialami oleh lansia semakin memberikan resiko kerentanan yang lebih untuk lansia mengalami berbagai perlakuan yang merugikan dan menderitakan yaitu, eksklusi sosial dan perlakuan salah atau elder abuse. Hal ini mengakibatkan lansia kehilangan beberapa hak dasar kemanusiannya yang dimaknai sebagai kekerasan struktural. Lansia penghuni panti werdha di Bekasi yang mengalami kekerasan struktural menjadi subyek penelitian, yang pengalamannya didapatkan melalui wawancara mendalam tidak terstruktur dan observasi partisipasi digunakan sebagai data untuk menganalisis dalam penelitian ini. Pendekatan penelitian yang digunakan adalah pendekatan kritis untuk melihat bagaimana kekerasan struktural yang dialami oleh lansia penghuni panti werdha di Bekasi sebagai hasil dari konstruksi sosial yang merendahkan tentang lansia.

ABSTRACT

This research discusses about structural violence experienced by the elderly. This research sees the social vulnerability experienced by the elderly as a result of the social construction degrading on elderly which is formed in the society structure. In addition the poverty experienced by the elderly, also increasingly provides more risk of vulnerability for them thus experiencing various treatments that are harmful and sufferable include, the social exclusion and elder abuse. This matter results in some losses of their human rights which is interpreted as a structural violence. The elderly residents of elderly nursing home in Bekasi experiencing structural violence are the subject of this research, which their experience were obtained through in-depth unstructured interviews and the observation of participation applied to analyze in this research. Critical approach had been applied for viewing how the structural violence experienced by the elderly residents of elderly nursing home in Bekasi as a result of the social construction degrading on elderly.;AbstractThis research discusses about structural violence experienced by the elderly This research sees the social vulnerability experienced by the elderly as a result of the social construction degrading on elderly which is formed in the society structure In addition the poverty experienced by the elderly also increasingly provides more risk of vulnerability for them thus experiencing various treatments that are harmful and sufferable include the social exclusion and elder abuse This matter results in some losses of their human rights which is interpreted as a structural violence The elderly residents of elderly nursing home in Bekasi experiencing structural violence are the subject of this research which their experience were
