Abstrak

[**ABSTRAK**]

Ibu menyusui merupakan salah satu kelompok yang beresiko tinggi mengalami kekurangan gizi akibat perilaku pantang makanan. Perilaku pantang makanan masih banyak terjadi di daerah yang masih memiliki budaya yang kuat. Penelitian ini bertujuan untuk menggali informasi lebih mendalam terkait perilaku pantang makanan pada ibu menyusui di desa Duwet Kedampul Kecamatan Tumpang Kabupaten Malang Jawa Timur. Desain studi yang digunakan adalah kualitatif deskriptif dengan menggunakan metode FGD pada ibu menyusui dan kader posyandu dan wawancara mendalam dengan anggota keluarga dan bidan desa. Hasil penelitian menunjukkan bahwa ibu menyusui masih mematuhi pantang makanan yang telah diturunkan antargenerasi. Faktor pencetus antara lain pengetahuan, kepercayaan, nilai, dan sikap. Ibu menyusui dan anggota keluarga memiliki sikap positif terkait perilaku pantang makanan tersebut. Sebaliknya, bidan dan kader posyandu memiliki sifat negatif terhadap pantang makanan pada ibu menyusui. Pantang makanan pada ibu menyusui didasarkan pada kepercayaan bahwa dengan menghindarkan makanan yang dipantang dapat mencegahkan ibu dan bayi terhadap bahaya (magis). Faktor pendukung antara lain yakni sarana berupa akses informasi yang didapat dari orang terdekat ibu menyusui, bidan, ataupun media cetak. Faktor penguat yakni pengaruh dari keluarga dan pengaruh dari petugas kesehatan sehingga diperlukan penyuluhan terkait pantang makanan pada ibu menyusui.
