Abstrak

ABSTRAK

Penelitian ini bertujuan untuk melihat hubungan antara komitmen dan forgiveness pada emerging adult yang sedang berpacaran. Pengukuran forgiveness menggunakan alat ukur Inventori TRIM (Transgression-Related Interpersonal Motivation) yang terdiri dari subskala avoidance, revenge, dan benevolece. Pengukuran komitmen menggunakan alat ukur Commitment Inventory (CI). Total responden dalam penelitian ini adalah sebanyak 190 responden berusia 18-25 tahun. Hasil penelitian ini menunjukkan adanya hubungan yang positif dan signifikan antara komitmen dan forgiveness yang ditandai dengan korelasi negatif antara skor total Inventori TRIM dan skor total CI ($r = -0,284$, $p < 0,01$). Hal ini mengindikasikan bahwa semakin tinggi komitmen yang dimiliki, semakin tinggi forgiveness terhadap pasangan.

ABSTRACT

The aim of this research was to examine the relationship between commitment and forgiveness among dating emerging adult. Forgiveness was measured by TRIM (Transgression-Related Inventory Motivation) Inventory which consists of avoidance, revenge, and benevolence subscales. Commitment was measured by Commitment Inventory. There were 190 participants aged 18 to 25. The result indicates that there is a positive significant relationship between commitment and forgiveness which is marked by negative correlation between total score of TRIM Inventory and total score of Commitment Inventory ($r = -.284$, $p < .01$). In other words, the more committed to their relationship, the more forgiving someone is.
