Abstrak

Penelitian ini tentang Hubungan antara Dosis Pajanan Kebisingan Personal dengan Keluhan Subjektif (Non Auditory) Pada Pekerja Di Area Utilities 05 Di Sebuah Perusahaan Pengolahan Minyak Dan Gas Bumi Tahun 2015. Pengukuran dosis pajanan bising personal diukur menggunakan alat Noise Dosimeter, sementara data responden dan keluhan subjektif (non audiotory) diperoleh menggunakan kuesioner. Metode yg digunakan dalam penelitian ini adalah kuantitatif dengan melakukan observasi dan pengumpulan data. Hasil penelitian menunjukkan tidak ada hubungan antara dosis pajanan kebisingan personal dan karakteristik pekerja dengan keluhan subjektif (non audiotory).
