Abstrak

Penelitian ini dilakukan untuk mengetahui hubungan fear of being single dan desakan menikah pada dewasa muda. Fear of being single pada penelitian ini diukur dengan menggunakan Fear of Being Single Scale dan desakan menikah diukur dengan Skala Desakan Menikah. Penelitian ini dilakukan pada 212 orang berusia 20 ? 40 tahun, belum menikah, dan berorientasi seksual heteroseksual di kawasan Jabodetabek. Analisis melalui teknik statistik korelasi dilakukan dan didapati bahwa fear of being single memiliki hubungan positif dengan desakan menikah.

.....

This study examined the correlation of fear of being single and mate urgency in young adulthood. In this study, fear of being single was measured by using Fear of Being Single Scale and mate urgency was measured by using Skala Desakan Menikah. The participants in this study were 212 people living in Jabodetabek, within the age range 20 ? 40, unmarried, and heterosexual. By using correlation techniques, it was found that fear of being single and mate urgency were positively correlated.
