

Hubungan antara dukungan kontekstual dan efikasi diri keputusan karier pada mahasiswa Universitas Indonesia = Relationship between contextual support with career decision self efficacy amongst undergraduate students of Universitas Indonesia

Ariani Dewi Setyaningtyas, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20412604&lokasi=lokal>

Abstrak

[Dalam perjalanan karier, keputusan karier merupakan hal yang sangat penting dan untuk mampu memilih dan mengambil keputusan karier yang baik dibutuhkan adalah efikasi diri keputusan karier. Efikasi diri keputusan karier berhubungan dengan dukungan kontekstual dari lingkungan mahasiswa. Tujuan dari penelitian ini adalah mengetahui ada tidaknya hubungan antara efikasi diri keputusan karier dengan dukungan kontekstual pada mahasiswa S1 Universitas Indonesia. Partisipan penelitian ini terdiri dari 516 mahasiswa S1 Universitas Indonesia dari seluruh fakultas. Efikasi diri keputusan karier diukur menggunakan Career Decision Self-Efficacy Short Form yang telah diadaptasi dan dimodifikasi oleh peneliti. Hasil penelitian ini menunjukkan korelasi yang signifikan positif antara efikasi diri keputusan karier dengan dukungan kontekstual. Melihat hasil dari penelitian ini, disarankan Badan Konseling Mahasiswa (BKM) untuk mempertimbangkan pengaruh kontekstual khususnya dukungan kontekstual dalam konseling permasalahan karier mahasiswa.

;Career decision is an important factor to be able to choose career wisely. In the course of someone's life, career is important because career carve outcome of someone education and experience. Career decision self-efficacy correlate with contextual support from a college student's life. The aim of this research is to find the correlation between career decision self-efficacy and contextual support amongst undergraduate student in University of Indonesia. 516 participant from each faculty take part in this research. Career decision self-efficacy was measured with Career Decision Self-Efficacy Short Form that modified to suit research condition. The outcome of this research is positive and significant correlation between contextual support and career decision self-efficacy. Considering the result of this research, Badan Konseling Mahasiswa (BKM) should consider contextual influences, particularly contextual support for better understanding about students career problem.
