Abstrak

**ABSTRAK**

Penelitian ini bertujuan untuk menguji secara empiris pengaruh praktik corporate governance dan institutional environment terhadap perilaku risk-taking perusahaan. Selain itu, penelitian ini juga menguji pengaruh moderasi institutional environment atas hubungan praktik corporate governance dengan perilaku risktaking perusahaan. Penelitian ini menggunakan sampel negara–negara yang termasuk wilayah Asia dengan melakukan observasi terhadap perusahaanperusahaan yang terdaftar di bursa saham masing-masing negara sampel untuk periode 2010 hingga 2013 dan terpilih 13 negara sampel dengan total perusahaan 12.123. Hasil pengujian menunjukkan bahwa praktik corporate governance dan institutional environment mendorong perilaku risk-taking perusahaan dan institutional environment memperkuat pengaruh praktik corporate governance terhadap perilaku risk-taking perusahaan.

**ABSTRACT**

This research aims to empirically analyze the effect of corporate governance practices and institutional environment on companies' risk-taking behaviour. It also investigates the moderating effect of institutional environment on the model. Included in the samples are some Asian countries, with additional observation of companies listed in their stock exchange during 2010 until 2013. Based on a sample of 13 countries with 12.123 companies, the result shows that corporate governance practices and institutional environment respectively encourage companies' risk taking behaviour. Meanwhile institutional environment also has strengthen the effect of corporate governance practice on company's risk taking behaviour.
