Abstrak

[Skripsi ini membahas hubungan kualitas kehidupan kerja dengan Kinerja perawat rawat inap RSUD Leuwiliang. Penelitian ini menggunakan penelitian kuantitatif dengan desain cross sectional, jumlah populasi pada penelitian ini adalah 84 orang, menggunakan alat ukur kuisioner, analisis yang digunakan adalah analisis univariat dan bivariat dengan uji statistik chi-square. Hasil penelitian, 2 (dua) variabel signifikan berhubungan dengan kinerja perawat yaitu variabel keterlibatan perawat dan variabel penyelesaian masalah. Saran untuk RSUD Leuwiliang bogor yaitu meningkatkan keterlibatan perawat, karena dengan meningkatkan keterlibatan perawat akan meningkatkan kinerja perawat 3 kali lebih tinggi dibandingkan dengan perawat yang tidak terlibat dalam pekerjaannya; This study discusses the relationship between quality of work life and nurses performance in inpatient ward, in Leuwiliang Hospital, 2015. This is a quantitative study with cross-sectional study design, using questionnaires and total sample of 84 nurses. The result showed that nurse involvement and problems solution are the factors related significantly with nurses performance. This study suggested that Leuwiliang Hospital should increase the involvement of nurses, so that it will improve the performance of nurses three times higher compared with the nurses who were not involved in the work; This study discusses the relationship between quality of work life and nurses performance in inpatient ward, in Leuwiliang Hospital, 2015.
