## Abstrak

[Penelitian ini membahas tentang modal sosial apa saja yang dimiliki LSM Bandungwangi sekaligus melihat bagaimana peran modal sosial tersebut dalam upaya pencegahan penularan HIV AIDS yang dilakukan di kalangan PSP. Hasil penelitian ini menunjukkan bahwa Bandungwangi sebagai sebuah LSM memiliki modal sosial berupa jaringan sosial yang menciptakan ikatan sosial antara Bandungwangi dengan PSP lembaga donor pemerintah. LSM lain dan antar Staf dalam Bandungwangi sendiri Ikatan sosial ini nyatanya membangun nilai dan norma bersama mengenai kebiasaan sehari-hari nilai bekerja sebagai PSP dan kelebihan Bandungwangi dalam menjangkau komunitas PSP. Nilai dan norma bersama ini yang kemudian membangun kepercayaan antar aktor. Bentuk modal sosial seperti ini menandakan bahwa bonding dan bridging Bandungwangi kepada aktor-aktor tersebut berhasil dibangun. Penelitian ini juga menemukan bahwa kelemahan modal sosial Bandungwangi terletak pada jaringannya dengan LSM lain yang kurang dimaksimalkan. Masing-masing bentuk modal sosial yang dimiliki LSM Bandungwangi juga terbukti berperan dalam membangun komunikasi koordinasi meningkatkan reputasi hingga menciptakan tindakan kolektif upaya pencegahan penularan HIV AIDS pada tataran partisipasi kegiatan. Penelitian ini mengisi kekosongan pembahasan mengenai modal sosial LSM dalam upaya pencegahan penularan HIV AIDS di kalangan PSP yang belum pernah dilakukan sebelumnya. Penelitian ini menggunakan pendekatan kualitatif dengan strategi studi kasus pada LSM Bandungwangi. Terdapat 12 informan dalam penelitian ini yang dipilih secara purposive.

.....This study discusses about what kind of social capital NGO in preventing the contagious of HIV AIDS by women sex workers. This study also looking for how social capital influence of preventing the contagious of HIV AIDS. The finding shows that Bandungwangi as an NGO has social capital there are social network who created social tie among Bandungwangi sex workers funding organizations government another NGOs and Stafs in Bandungwangi who was sex workers. This social tie builds the collective values and norms about daily habits work rsquo s point of view as sex workers. Collective values and norms build the trust between the actors This kind of social capital mark that Bandungwangi's bonding and bridging to another actors perfectly build. The finding also shows that the weakness of Bandungwangi's social capital is social network with other NGO. Each of these forms Bandungwangi's social capital also proved instrumental in building communication coordination improved reputation and creating collective action to participation activities of preventing the contagious of HIV AIDS. This study fills a void a discusiion about social capital NGO in preventing the contagious of HIV AIDS by women sex workers that has never been done before. This study using qualitative approach with study case strategy in Bandungwangi NGO in East Jakarta. Consist of twelfth participants they were selected by purposive sampling.;This study discusses about what kind of social capital NGO in preventing the contagious of HIV AIDS by women sex workers This
