[<b>ABSTRAK</b><br>

Kerusakan lingkungan di wilayah kerja PT. X Bojenegara, Banten masih sering terjadi. Sebagian besar penyebab kerusakan lingkungan di wilayah kerja PT. X seperti pencemaran udara, air, dan tanah akibat dari perilaku pekerja yang tidak memiliki sikap kesadaran lingkungan dalam bekerja. Beberapa faktor, yaitu kesadaran lingkungan dan program Industrial Hygiene digunakan untuk melihat adanya hubungan dengan perilaku pekerja di PT. X. Penelitian ini dilakukan di PT. X Bojonegara, Banten pada bulan Februari 2015 sampai dengan bulan Maret 2015 dengan menggunakan pendekatan kuantitatif dan metode pengumpulan data berupa kuesioner, observasi lapangan serta wawancara mendalam. Terdapat 79 responden dan 5 orang informan yang dianalisis dengan statistik univariat, bivariat dan multivariate. Hasilnya terdapat hubungan antara kesadaran lingkungan dan program Industrial Hygiene dengan perilaku pekerja ( $R = 0,292$ ). Nilai korelasi sebesar 0,292 menunjukkan bahwa hubungan antara kesadaran lingkungan dan program Industrial Hygiene dengan perilaku pekerja adalah sedang.
