Abstrak

[ABSTRAK

Salah satu bentuk kepatuhan bank umum terhadap regulasi dari Bank Indonesia adalah dengan menyerahkan laporan informasi debiturnya atau laporan SID di setiap bulannya. Laporan ini harus dibuat sesuai dengan pedoman yang ada serta diserahkan tepat waktu atau bank akan mendapat teguran. Berdasarkan data laporan sanksi SID, Bank X diharuskan membayar denda ke Bank Indonesia dikarenakan laporan SID diserahkan tidak tepat waktu dan belum akurat. Untuk mengatasi hal ini maka Bank X hendak memperbaiki sistem pendukung yang menghasilkan laporan tersebut. Berdasarkan alasan tersebut maka pengerjaan karya akhir ini berupaya untuk menggali kebutuhan sistem dengan menggunakan metodologi Rational Unified Process. Adapun hasil dari penelitian ini berupa artefak dari workflow requirement yang bisa digunakan untuk perbaikan sistem guna mengatasi permasalahan di laporan SID.

ABSTRACT

In each month, banks should submit a report of its debtor information to Bank Indonesia (SID Report). This report should be made in accordance with existing guidelines and submitted on time or the bank will be reprimanded. Based on the report data sanctions, Bank X is required to pay fines to Bank Indonesia due SID report is not submitted on time and not accurate. To overcome this, the Bank X was about to fix the support system that produced the report. Based on these reasons, the workmanship of this thesis seeks to explore the needs of the system by using the Rational Unified Process methodology. The results of this study in the form of workflow requirements artifacts that can be used to enhance the system in order to overcome the problems in the SID Report.;In each month, banks should submit a report of its debtor information to Bank Indonesia (SID Report).
