[ABSTRAK

PROPER adalah program unggulan Kementerian Lingkungan Hidup untuk mendorong penataan perusahaan dalam pengelolaan lingkungan hidup melalui instrumen informasi. Pengumuman hasil penilaian PROPER mendapatkan kritik dari masyarakat yaitu tidak transparan, akuntabel dan profesional, padahal PROPER sebagai satu-satunya program command and control pemerintah yang menganut prinsip good environment governance. Oleh karena itu, perlu dimaksimalkan kelembagaan dan penerapan prinsip good governance pada PROPER sebagai bagian dari usaha pemerintah dalam pengawasan industri. Pendekatan yang digunakan dalam penelitian ini adalah kualitatif dengan metode pengumpulan data melalui wawancara mendalam. Penelitian ini menemukan bahwa pelaksanaan mekanisme proses penilaian PROPER saat ini berjalan dengan baik sesuai dengan peraturan yang berlaku. PROPER masih belum menerapkan good governance dengan baik. Prinsip yang belum dimaksimalkan adalah transparansi dan partisipasi.

ABSTRACT

PROPER is one of the main programs of the Ministry of Environment to encourage company compliance in environmental management through information instruments. PROPER assessment announcement results drew criticism from the public that is not transparent, accountable and professional, whereas PROPER as the only command and control government program that adheres to the principles of good governance environment. Therefore, it should be maximized institutionally and implementable for good governance principles in the PROPER as part of government efforts in surveillance industry. The approach used in this study was a qualitative method of collecting data through in-depth interviews. This study found that implementation of the mechanism of PROPER assessment process is in progress well in accordance with the applicable regulations. However, this study found that the implementation of PROPER needs to be improved particulary in the area of transparancy and participation., PROPER is one of the main programs of the Ministry of Environment to encourage company compliance in environmental management through information instruments.
