Abstrak

[Program Keluarga Harapan (PKH) adalah program bantuan tunai bersyarat pertama di Indonesia. PKH merupakan cara baru penanggulangan kemiskinan yang sekaligus memutus rantai kemiskinan generasi yang akan datang. Berbagai studi telah dilakukan untuk melihat dampak program ini. Secara umum studi-studi tersebut menunjukkan bahwa PKH mempunyai dampak yang positif. Studi ini bertujuan melihat dampak PKH terhadap kesejahteraan masyarakat di Kabupaten Brebes.

Rancangan studi ini menggunakan uji kuantitatif pengeluaran konsumsi berbasis rumah tangga dengan pengukuran sebelum dan sesudah intervensi dan antara rumah tangga penerima program (treatment) dan rumah tangga bukan penerima program (control). Temuan penting studi ini adalah bahwa PKH secara signifikan meningkatkan rata-rata pengeluaran konsumsi rumah tangga peserta program sebesar Rp 60.798 per kapita per bulan atau sekitar 14 persen dibanding sebelum program.
