Abstrak

[ABSTRAK

Masalah keselamatan pasien yang ditimbulkan oleh mahasiswa dapat menimbulkan berbagai dampak yang merugikan bagi pasien. Pembimbing klinik berperan penting dalam membimbing mahasiswa dalam pelaksanaan program keselamatan pasien. Komunitas praktisi pembimbing klinik ditengarai mampu meningkatkan peran pembimbing klinik dalam program keselamatan pasien oleh mahasiswa. Penelitian ini bertujuan untuk mengukur pengaruh komunitas praktisi pembimbing klinik terhadap peran pembimbing klinik dalam program keselamatan pasien oleh mahasiswa. Metode penelitian ini menggunakan desain pre experimental dengan sampel sebanyak 36 mahasiswa profesi Ners yang sedang praktik di ruang rawat inap RSISA yang mendapatkan bimbingan dari pembimbing klinik yang mengikuti komunitas praktisi pembimbing klinik. Data dianalisis dengan menggunakan uji Wilcoxon. Hasil penelitian ini menunjukkan terdapat pengaruh komunitas praktisi pembimbing klinik terhadap peran pembimbing klinik dalam pelaksanaan program keselamatan pasien oleh mahasiswa $p < 0,001$. Penelitian ini merekomendasikan perlunya keterlibatan pembimbing klinik dari institusi pendidikan untuk menjadi bagian dari komunitas praktisi pembimbing klinik.

ABSTRACT

The problem of patient safety which is caused by nursing students can effect disadvantage to patient. The clinical instructor have important role to guide nurse student in implementation patient safety program. Community of practice clinical instructor was predicted can increase the role of clinical instructor in patient safety program by student. The purpose of this study is to explore the the influence community of practice clinical instructor to the role of clinical instructor in patient safety program by student. This research is pre experimental with the number of samples are 36 Ners student in ward RSISA who get guidance from clinical instructor. The data analysis that use of this research is wilcoxon test. The result show that there is significant influence community of practice clinical instructor to the role of clinical instructor in patient safety program by student $p < 0,001$. The researcher suggests that the clinical instructor from education institution should be part in community of practice clinical instructor.
