Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20415020&lokasi=lokal>

Abstrak

[ABSTRAK

Dalam penelitian ini, penulis meneliti mengenai apakah revenue atas pengelolaan site tower berdasarkan perjanjian interkoneksi di bidang telekomunikasi dapat dialihkan, prosedur dan mekanisme pengalihan revenue atas pengelolaan site tower berdasarkan perjanjian interkoneksi di bidang telekomunikasi, dan dokumendokumen apa saja yang diperlukan dalam revenue atas pengelolaan site tower berdasarkan perjanjian interkoneksi dalam bidang telekomunikasi. Penelitian yang dilakukan untuk tesis ini menggunakan metode yuridis normatif (normative research) yang didukung oleh pendekatan yuridis empiris dengan prosedur pengumpulan data yang sumbernya adalah bahan dari kepustakaan dan dari wawancara. Dari pembahasan atas permasalahan-permasalahan tersebut, dapat disimpulkan bahwa revenue atas pengelolaan site tower berdasarkan perjanjian interkoneksi dapat dialihkan, prosedur dan mekanisme pengalihan revenue atas pengelolaan site tower berdasarkan perjanjian interkoneksi di bidang telekomunikasi adalah adanya berita acara kesepakatan pelaksanaan pengalihan revenue atas pengelolaan site tower, dibuatnya perjanjian pengalihan revenue atas pengelolaan site tower antara penyedia akses dengan operator pengganti, dibuatnya perjanjian pengalihan pembayaran revenue antara pencari akses dengan operator pengganti. Proses pengalihan revenue atas pengelolaan site tower tersebut dibuat dalam perjanjian tertulis berupa perjanjian pengalihan. Adapun saran dari hasil penelitian tesis ini adalah sebaiknya perjanjian interkoneksi dan perjanjian pengalihannya dibuat secara otentik atau dengan jasa notaris dan sebaiknya hal-hal yang diperjanjikan dalam perjanjian pengalihan revenue seperti blanko milik PT. Telkom dapat diperjelas lagi

ABSTRACT

In this research, writer research on whether revenue on the management of site tower based on interconnection agreement in telecommunication can be assignment, procedure and mechanism assignment of revenue on the management of site tower based on interconnection interconnection in telecommunication, and the documents any lengths necessary in revenue on the management of site tower based on interconnection agreement in telecommunication. Research for this thesis is using judicial normative method (normative research) that is supported by an approach

judicial empirical with the procedure data collection is from literature and from interview. From the discussion of these issues, it can be concluded that the revenue on the management of site tower based on interconnection agreement can be assignment, procedures and mechanisms for the assignment of revenue on the management of site tower based on interconnection agreement in telecommunication is the implementation of the assignment agreement for report revenue on management of site tower, made an assignment of revenue agreement on the management of site tower between access provider with replacement operator, made an assignment of evenue payment agreement between access seekers with replacement operator. The process of assignment of revenue on the management of site tower was made in a written agreement in the form of assignment agreement. The suggestion from the research of this thesis is the interconnection agreement and the assignment agreements is better written by a notary and and better the things in the assignment of revenue agreement such as blank-owned PT. Telkom should be more obvious, In this research, writer research on whether revenue on the management of site tower based on interconnection agreement in telecommunication can be assignment, procedure and mechanism assignment of revenue on the management of site tower based on interconnection interconnection in telecommunication, and the documents any lengths necessary in revenue on the management of site tower based on interconnection agreement in telecommunication.
