Abstrak

Penelitian ini membahas mengenai perbandingan biaya pengelolaan limbah medis padat di Rumah Sakit Kanker "Dharmais" antara sistem swakelola dengan sistem outsourcing. Penelitian ini adalah penelitian deskriptif kuantitatif dan dilakukan dengan cara pengamatan, telaah dokumen langsung, dan perhitungan biaya menggunakan metode Activity Based Costing (ABC). Dari hasil penelitian diketahui bahwa alur proses pengelolaan limbah medis sudah berjalan baik dan pengelolaan limbah medis padat secara outsourcing lebih murah dibanding swakelola. Untuk mengurangi limbah medis padat, masih dapat dilakukan upaya minimisasi limbah.

.....This study discusses The comparative cost analyse of solid medical waste management in the "Dharmais" Cancer Hospital between self-managed system with outsourcing system. This research is a quantitative and descriptive study was done by observation, document review, and the calculation of the cost of using Activity Based Costing (ABC). The survey results revealed that the flow of medical waste management process has been running good and solid medical waste management outsourcing system is cheaper than self-managed. To reduce solid medical waste, they can do waste minimization efforts.
